

A benchmark for the project management maturity and competency level of your organization. This workshop provides you and your team a detailed analysis of all PM areas to find strengths and weaknesses and define targeted measures. It is optimized for your needs and the daily challenges of your projects.

Objectives

- Define and prioritize the best measures to build the PM competency in your organization
- Create the basis for repeatable success of your internal and customer projects
- Secure the investments in your organization, employees, methodology and infrastructure

Topics

- Basics for project management structure
- Change management as the success factor
- Maturity over complexity
- From problem to measure
- PM maturity models
- Analysis of current/targeted maturity levels
- Consolidation of PM field of duty
- Prioritization of all measures
- PM development roadmap initialization
